

# Quantivate GRC Solutions for Banks

Eliminate data silos to gain a consolidated view of governance, risk, and compliance activities.

## Strengthen Compliance, Mitigate Risks, and Streamline Processes

Regulatory requirements for Banks and other financial institutions are on the rise from both state and federal agencies. In addition to the increasing regulations, customers and clients are requiring more service, while management and investors are requiring greater ROI from software, services, and systems to show greater profitability. These regulations and pressures are compelling Banks to streamline their processes.

## The Quantivate GRC Software Solution

With the Quantivate GRC Suite for Banks and Financial Institutions, organizations can easily integrate distinct yet interdependent disciplines such as business continuity, third party risk management, information and IT security, audit management, regulatory compliance, and enterprise risk management.

Quantivate's true SaaS platform is designed to allow seamless data integration between the various Quantivate GRC modules. Its flexible design allows the solution to scale to the needs of your organization and help establish comprehensive Governance, Risk, and Compliance programs across the enterprise.

With Quantivate GRC solutions, Banks can document, track, and manage all GRC initiatives at all levels of the organization. Quantivate's GRC software solution for banks allows organizations to focus on:

- Identifying and mitigating risks including enterprise, IT, compliance, and vendor.
- Gaining better visibility into vendor management and compliance programs
- Remaining compliant with regulations such as FDIC, FFIEC, PCI DSS, CFPB, or SOX.
- Securing IT risks and customer information.
- Managing the Audit process.
- Remaining active and profitable in the event of a disaster.
